Update #2 to the invite

Adding the presentation and the approved workplan for PFBS and GenX

=====

Update #1 to the invite - adding DC room, Adobe and dial in information:

Room in DC for those present: RRB 41213

Dial in: Ex. 6 Personal Privacy (PP)

Adobe Link: Ex. 6 Personal Privacy (PP)

Colleagues - as you are aware, EPA is moving ahead with developing standard toxicity assessments and values for two PFAS of interest, GenX and PFBS. Both are based on substantial existing work by ORD and OPPT, and as such are on fast tracks for completion - 6 months is the goal. OW is leading the development of the GenX assessment, and ORD/NCEA is leading PFBS.

The Workplan for these two assessments (attached) calls for **periodic updates to the cross agency PFAS HH tox workgroup**, at key points in advance of some external stakeholder briefings. As documented in the Workplan, the **purpose of these updates is “to ensure cross-agency awareness and obtaining technical input at key intervals in the process.”** Basically we will present the same information to the workgroup that we plan to present to stakeholders, and listen to any comments or feedback that Workgroup members care to offer.

The first of these updates to the tox WG is being scheduled for Thursday at 1:00, please look for an invite. For this first call, after the update, there will also be an opportunity for the Workgroup members to discuss amongst yourselves how you would like to engage in future updates. Lynn Flowers will lead that part of the discussion.

Looking forward to briefing you all on Thursday. Regards, Andy
